<b>Email</b>	Koreainvestigation@gmail.com

IPIA is

In January 2002, we established Search & Find Corp. (S&F), the first private investigation company in Korea, and began providing services such as investigation of the whereabouts of fugitives abroad and repatriation consulting, confirmation of the whereabouts of separated families, and investigation of foreign companies, thereby making a leap forward as an international investigation company.

Starting with successfully locating and repatriating to Korea an Interpol wanted person who had committed a quasi-financial fraud case worth billion won and fled to Canada in 2003, and through a recommendation for his surrender, we have successfully resolved approximately 20 large-scale cases in Korea, including locating and repatriating a person in a banking case who had committed a 445 billion won CD counterfeiting case and fled to China in 2005, locating and repatriating a person wanted in Canada who had committed an investment fraud worth 30 billion won in 2006, and locating and repatriating a criminal who had fled to Thailand after cashing in billion won worth of cigarettes and was then on an Interpol red notice in 2008. As a result, we have been recognized for our solid capabilities and know-how, and have garnered attention from domestic and foreign media and related industries.

And in 2012, we established a detective agency in Colorado, USA, and established the system of a global detective agency. By 2015, we had grown into a Global Private Investigation & Detective Service Corporation with headquarters in Idaho, USA, and an investigation network in over 80 countries around the world.

In addition, by 2022, we will have an international detective network in over 90 countries around the world , and in particular , we will establish a detective agency in the UK, the birthplace of detectives, to expand the detective service market in Europe, thereby solidifying our position as a true global international detective agency .

Our practice is available to both individuals and companies, but since investigations are always conducted within the scope permitted by the laws of the country and within the scope of the investigator's authority , the decision to accept a case is always made through consultation . If you need assistance, please contact us today.

We will do our best to think things through together and come up with a good solution.

James Seungho Choi President
